

4 Benefits of Behavioral Health Partnership for Hospital Performance

Meeting today's behavioral health need is vital to ensuring the health of the community, and relieves demand on emergency departments and other key areas of a hospital's core operations.

1 Enhanced Quality Through Specialized Expertise

The right partner has access to exemplary resources, best practices and national trends – enabling a hospital to better integrate and provide behavioral health services in a cost-effective way.

Strategic Partnership Helps Improve:

- Quality
- Patient Experience
- Employee Satisfaction
- Hospital Efficiency

2 Greater Clinical and Operational Efficiency

A hospital can begin to improve clinical and operational processes and efficiency in areas such as:

Staff Optimization

Enhanced Quality Outcomes

3 Reduced Patient and Staff Risk

Incorporating innovative solutions that have been proven to reduce risk for behavioral health patients and improve staff compliance, such as:

4 Greater Ability to Serve the Community

Incorporating behavioral health services into other post-acute settings generates positive outcomes for both behavioral and physical health. This creates:

Cost Savings
Patient Satisfaction
Behavioral Health
Illness Education¹
